

PUERTAS METALICAS

PUERTA METALICAS DE SEGURIDAD DOMICILIARIA

Puertas de acero enlucidas tipo Madera o Pintadas de 50 mm. 70 mm. Y 90 mm. De espesor.

Estructura de Puertas

PRODUCT DISPLAY STRUCTURE

1. Once-formed door leaf is made of Q235 hot rolled steel plate
2. Double-head lock fork for the upside and downside
3. Solid steel double-head side locks
4. AB mechanical lock
5. The lower device uses stainless steel sleeve welding structure
6. Inlaid full-steel adjustable hinges with an angle of 180 or 110 degrees
7. Invisible alarm doorbell
8. Peephole with wide angle of 200 degrees
9. After pickled, phosphorized, and rustproofed, the surface also adopts hot timber grain transfer-printing treatment
10. Door faceplate is made of Q235 cold rolled plate and formed at once through pressing mold.
11. The inner fillings adopt mixed fillings with honeycomb paper.

series STEEL EXTERIOR DOORS

patent code: ZL200430111875.X

| SF-615 |

STEEL EXTERIOR DOORS	Width	880mm 980mm 1080mm	Lockset	AB lock	Aero lock
	Height	1970mm 2050mm	Peephole	Wide angle	Clear vision
	Thickness	50mm 70mm 90mm	Doorbell	Ordinary	Alarm doorbell
	Hinge	Visible	Invisible	Door&H	Brass&steel
